

```
public class Null{
    void foo(boolean b){
        String x = null;
        if(b){
            x = "Hello World";
        }
        x.toString();
    }
}
```

1

```
public class Null{
    void foo(boolean b){
        String x = null;
        if(b){
            x = "Hello World";
        }
        if(x != null)x.toString();
    }
}
```

3

```
public class Null{
    void foo(boolean b){
        String x = null;
        x.toString();
    }
}
```

A 'NullPointerException' could be thrown; 'x' is nullable. IntraJ(x)
